About Google:

Google is the world's largest search engine with 80% of the world's internet users, using Google. While in India, we have over 25 million unique users and 83% of them use Google.

About Google AdWords:

The latest and effective search-marketing tool that we were speaking of is Google AdWords. More and more small to medium-sized businesses are seeing great results with online advertising. When you advertise with Google, ads for your business show up next to the natural search results. In this way, Google AdWords ads connect you with potential customers precisely when they're looking for the products and services you offer.

Send SMS for FREE all over INDIA

1997 - Hotmail asked "Why can't personal email be FREE?"

2007 - SMSCountry questions "Why can't personal SMS be FREE?"

160by2 (a SMSCountry initiative) endeavors to revolutionize the very concept of sending SMS - from a PAID service to a FREE service. You can now send free SMS messages, 80 characters long, within India to all your near and dear.

How to Register? Click [here](#) to register. On successful registration, you shall receive a "password" on your mobile (with which you have registered). Using this "password" and the registered "username", you can logon to www.160by2.com and start sending FREE SMS.

How does 160by2 work?

160by2 allows YOU to send Free SMS up to 80 characters long. Advertisers are allowed to append a contextual advertisement to your SMS, making up the rest of the 80 characters.

160by2 = 80 for YOU + 80 for Advertisers

What do you mean by Contextual Advertisement?

Based on the recipient's location, the time of the SMS sent and the text of your SMS message, 160by2 delivers the most relevant advertisement.

Do you read my personal messages before appending the contextual advertisement?

Delivering contextual advertisements and related links is the key to provide YOU this FREE service. 160by2 stores and processes your SMS messages. This is a completely automated process with ABSOLUTELY no human intervention.

How 160by2 is different from other Free SMS service providers?

Although there are free web-based or instant messaging SMS providers - some allow free messaging by
